

Available Modielive Kits

01 | Modielive EMF Generator

Includes:

- Modielive EMF Generator

02 | Modiewark AC / Modielive Kit

Includes:

- Modiewark AC Tester
- Modielive EMF Generator
- Hard Carry Case

03 | Industrial DC80 / Modielive Kit

Includes:

- Modiewark DC80 Tester
- Modielive EMF Generator
- 2x Rechargeable Batteries
- Battery Charger
- Padded Hard Metal Carry Case
- Car Adapter

04 | Modiewark AC Spout / Modielive Kit

Includes:

- Modiewark AC Tester
- Modielive EMF Generator
- Spout Carry Case
- Chosen Length Spout

Explore our full range of
Voltage Detectors Today!

05 | Fire and Rescue DC50 / Modielive Kit

Includes:

- Modiewark DC50 Tester
- Modielive EMF Generator
- 2x Rechargeable Batteries
- Battery Charger
- Padded Hard Metal Carry Case
- Car Adapter

More kits are available with hot sticks and other accessories.

Warning:

High voltage testing must only be carried out by trained personnel. Read all instructions carefully before use.

The Modiewark tester is not designed to operate where mains cables are armoured or enclosed in metal conduit, run underground, or in any situation where the AC or DC field is negated by metal shielding. Do not hold this instrument in contact with any energised conductor.

This device must only be used strictly in accordance with these instructions. GL McGavin Pty Ltd accepts no liability for any loss, damage, or injury arising from use of this tester by untrained personnel, unauthorised alteration of the tester, or use outside its intended operating conditions.

Modielive EMF Generator Brochure

The perfect high voltage detector companion

The Modielive EMF Generator is the perfect partner to your Modiewark AC or DC non-contact voltage detector. It produces a reliable electromagnetic field on demand, letting you instantly prove your detector is working correctly - before it matters most.

Always pair your Modiewark alongside a Modielive as part of a complete testing procedure. When it comes to electrical safety, confidence isn't optional but necessary.

Generate a test signal, confirm detection, work with confidence.

Warning: High voltage testing should only be carried out by trained personnel. Do not hold this instrument in your hand and make contact with live electrical conductors in excess of 650V AC.

The Modielive provides peace of mind when testing for high voltage.

Determining live or dead power situations is critical for your safety. Pairing the Modielive and Modiewark creates the ultimate safety tool. Giving you the confidence you need to help keep you safe from electrical hazards.

Skipping this simple verification step can leave you more vulnerable when working around electricity. Backed with over 60 years of manufacturing, G.L McGavin builds to the same standards that our customers have trusted for decades.

The G.L McGavin Modielive is purpose-built to test and verify our very own non-contact voltage tester range. The Modielive generates a reliable EMF signal so you can confirm that your tester is working correctly.

Simply hold both LIVE and TEST ends together and you instantly get the confidence that you need in electrical environments.

Generate a test signal.
Confirm detection.
Work with confidence.
Ready. Tested. Trusted.

Why you should choose G.L McGavin

We invented the world's first non-contact voltage detector. It's the name you can trust.

Trusted since 1959

The Modiewark today is a global leader, advancing the safety of all personnel who work around electricity.

Setting world standards

When setting US industry standards for non-contact voltage detectors, they referenced and utilised the Modiewark tester to set benchmarks.

Global leaders

G.L McGavin products are sold globally, with highly satisfied customers who have relied on our safety equipment for decades.

Australian made and owned

G.L McGavin has always and will continue to be Australian owned and operated. We are proud manufacturers who build right here in Australia.

Modiewark & Modielive

The Modiewark is a Non-Contact Voltage Detector that detects the presence of an alternating electric or electromagnetic field. Its unique switching action allows for the identification of alternating currents at distances between 200 to 300mm from a voltage source.

The Modiewark can detect voltage sources ranging from 50V to over 1,000,000V AC with differing models allowing the tester to detect different voltage fields.

Paired with the Modielive, the Modielive produces its own testing field, allowing you to verify that the Modiewark correctly detects it. This self-test gives you peace of mind that your Modiewark is operating correctly, so that in any real electrical scenario, you can trust its readings are accurate.

GL McGavin offer a full range of AC and DC testers — be sure to check them out today!

Modielive Specifications

Voltage range:	Varies on model
Weight (no batteries):	Varies on model
Battery:	2x PP3 batteries
Length:	183 mm
Diameter:	52 mm
Battery Life:	Varies on model

Produces an AC field capable of
testing the Modiewark up to 500kV

Available with
the world leading
Modiewark range of
voltage testers
